We have been working with A.M Sports for a number of years. We like to offer our students a full range of activities to help them develop in all aspects of life. Playing sports and being active is an important part of our pupil's wellbeing which is why we wanted to work with A.M Sports.

Our students, who range from 4 - 16 years, have a variety of special needs, specifically communication and comprehension needs. Playing sports gives our students the opportunity to develop their motor skills and hand eye coordination, as well as having fun with their friends.

A.M Sports are a team of friendly, enthusiastic, trained professionals who understand our pupils needs and adapt the activities according to their abilities. Currently they are coming into school every day, at lunch time, to deliver fun activities such as basketball, football, hockey and netball. They are very reliable, and they have built good relationships with our students and they look forward to them coming in. They understand the different needs and adapt their style to suit the activity and pupils they are working with. As a school we would recommend using A.M sports.

A handwritten signature in black ink, appearing to read "S. L. T. O.", written in a cursive style.
